ABOUT THE SITE

The LyondellBasell [Lake Charles Polyolefins Plant](#) is located in Westlake, near the city of Lake Charles. The site includes a cogeneration facility that produces steam and electricity, and it operates its own waste water treatment plant. The site has a highly trained response team that utilizes mobile firefighting equipment and fixed systems including three diesel and three electrically driven fire water pumps backed up by a fire water reservoir with an 850,000 gallon capacity. Site expansions include the addition of the cogeneration plant in 2011 and the completion of the K-Line polypropylene debottleneck

PRINCIPAL PRODUCTS

- Polypropylene
- Cataloy resins

SAMPLE PRODUCT END USES

Construction and roofing materials

Food packaging

Small household appliances

Automotive exteriors

Caps and closures

LyondellBasell is committed to being a responsible, good neighbor in the communities where we operate. Through our global corporate citizenship program, *Advancing Good*, we invest in charitable organizations supporting three key focus areas: Advancing Our Communities, Advancing Our Planet, Advancing Tomorrow's Workforce.

ABOUT LYONDELLBASELL

As a leader in the global chemical industry, LyondellBasell strives every day to be the safest, best operated and most valued company in our industry. The company's products, materials and technologies are advancing sustainable solutions for food safety, access to clean water, healthcare and fuel efficiency in more than 100 international markets. LyondellBasell places high priority on diversity, equity and inclusion and is Advancing Good with an emphasis on our planet, the communities where we operate and our future workforce. The company takes great pride in its world-class technology and customer focus. LyondellBasell has stepped up its circularity and climate ambitions and actions to address the global challenges of plastic waste and GHG emission reduction.
